

THE PHILOSOPHICAL MAGAZINE

EDITOR

PROFESSOR N. F. MOTT, M.A., D.Sc., F.R.S.

EDITORIAL BOARD

SIR LAWRENCE BRAGG, O.B.E., M.C., M.A., D.Sc., F.R.S.

SIR GEORGE THOMSON, M.A., D.Sc., F.R.S.

PROFESSOR A. M. TYNDALL, C.B.E., D.Sc., F.R.S.

VOL. XLV.—SEVENTH SERIES

JANUARY—DECEMBER 1954

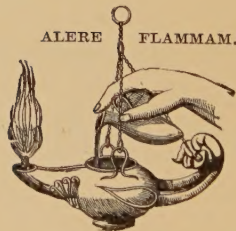

LONDON:

TAYLOR & FRANCIS, LTD., RED LION COURT, FLEET STREET, E.C.4.

“Meditationis est perscrutari occulta; contemplationis est admirari perspicua....Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem.”—*Hugo de S. Victore.*

—“Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condât,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu.”

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. XLV. (Nos. 360-371)
(SEVENTH SERIES)

7th ser
v. 45

NUMBER 360—JANUARY

	Page
I. Boundary Layer Growth on a Spinning Body. By C. R. ILLINGWORTH, Department of Mathematics, The University, Manchester.	1
II. On the Validity of Mott's Theory of the Beta-Flow in Polycrystals. By PAUL FELTHAM, Standard Telecommunication Laboratories, Enfield, Middlesex	9
III. Analysis of V-Events. By J. PODOLANSKI and R. ARMENTEROS, The Physical Laboratories, University of Manchester	13
IV. Radioactivity of Neutron Excess Iridium Isotopes. By F. D. S. BUTEMENT and A. J. PoË, Atomic Energy Research Establishment, Harwell, Berks.	31
V. The Mean Lifetime of the V_1^0 -Particles. By D. I. PAGE and J. A. NEWTH, The Physical Laboratories, The University, Manchester.	38
VI. Angular and Energy Distributions in Energetic Pion Interactions with Nuclei. By A. H. MORRISH, Radiation Laboratory, McGill University, Montreal, Canada	47
VII. Gamma Radiation from the Decay of $^{238}_{90}\text{Th}$. By J. O. NEWTON and B. ROSE, Atomic Energy Research Establishment, Harwell.....	58
VIII. The Brownian Movement of Linear and Non-Linear Systems. By D. K. C. MACDONALD, Division of Physics, National Research Council, Ottawa	63
IX. Note on the Theory of Brownian Motion in Non-Linear Systems. By D. POLDER, H. H. Wills Physical Laboratory, University of Bristol.	69
X. The Thermal and Electrical Conductivity of Magnesium at Low Temperatures. By H. M. ROSENBERG, The Clarendon Laboratory, Oxford	73
XI. The Quantization of Sound Waves—I: General Theory. By O. PENROSE, Royal Society Mond Laboratory, Cambridge, England.....	80
XII. A Variation Principle for Electronic Wave Functions in Crystals. By D. P. JENKINS and L. PINCHERLE, Radar Research Establishment, Ministry of Supply.....	93
XIII. Correspondence :—	
The Propagation of Heat in Liquid Helium. By J. M. ZIMAN, Clarendon Laboratory, Oxford	100
Optical Determination of the Thickness of the Unsaturated Helium II Film. By N. G. McCrum and K. MENDELSSOHN, F.R.S., Clarendon Laboratory, Oxford	102
Slip Lines, Etchpits and Corrosion-pits. By A. H. ABDOU, Department of Metallurgy, Sir John Cass College, London, E.C.3	105
XIV. Notices of New Books and Periodicals received :—	
AJIT RAM VERMA's Crystal Growth and Dislocations	106
S. CHAPMAN and T. G. COWLING's The Mathematical Theory of Non-uniform Gases	106
R. COURANT and D. HILBERT's Methods of Mathematical Physics	106
J. B. BIRKS's Scintillation Counters	107

	Page
Sir JAMES CHADWICK'S Radioactivity and Radioactive Substances	107
A. H. WILSON'S The Theory of Metals	108
J. A. A. KETELAAR'S Chemical Constitution: An Introduction to the Theory of the Chemical Bond.....	108
C. KITTELL'S Introduction to Solid State Physics	109
R. v. D. R. WOOLLEY and D. W. N. STIBBS'S The Outer Layers of a Star	109
E. SEGRE'S Experimental Nuclear Physics, Vol. II.	110
A. G. GAYDON and H. G. WOLFHARD'S Flames, their Structure, Radiation and Temperature.....	110

NUMBER 361—FEBRUARY

XV. Slow Inelastic Collisions between Atomic Systems. By D. R. BATES, Queen's University, Belfast, and H. S. W. MASSEY, F.R.S., University College, London.....	111
XVI. An Attempt to Find Anisotropy in the Superconductive Properties of Gallium. By A. J. CROFT and Mrs. J. L. OLSEN-BAER, Clarendon Laboratory, Oxford University, and R. W. POWELL, National Physical Laboratory.....	123
XVII. Pile Modulation and Statistical Fluctuations in Piles. By O. R. FRISCH and D. J. LITTLER, Atomic Energy Research Establishment, Harwell, England.....	126
XVIII. Electronic Conduction in Grey Tin. By J. T. KENDALL, Electrical Engineering Department, Imperial College of Science and Technology, London, S.W.7.....	141
XIX. A Method for the Measurement of Multiple Scattering. By H. ÖVERÅS, Fysisk Institutt, Norges tekniske høyskole, Trondheim, Norway.....	158
XX. Some Ordering Effects in Cu_3Au at about 100°C . By R. A. DUGDALE and A. GREEN, Atomic Energy Research Establishment, Harwell, Berks.....	163
XXI. Nuclear Reactions Produced by Nitrogen and Oxygen Ions. By K. F. CHACKETT, J. H. FREMLIN and D. WALKER, Department of Physics, University of Birmingham.....	173
XXII. Nuclear Disintegrations Caused by 50–125 mev Protons: II. By P. E. HODGSON, Imperial College of Science and Technology, London, S.W.7.....	190
XXIII. Distance Correlations in an Ideal Fermi–Dirac Gas. By A. B. LIDIARD, Department of Physics, University of California.....	202
XXIV. Experiments with Thin Films of Silver Sulphide, Silver and Gold. By J. H. BURROW and J. W. MITCHELL, H. H. Wills Physical Laboratory, University of Bristol.....	208
XXV. Correspondence:—	
Observations on the Fatigue Fracture of Copper. By N. J. WADSWORTH and N. THOMPSON, H. H. Wills Physical Laboratory, University of Bristol.....	223
The Quantum Yield of the $\text{F} \rightarrow \text{Z}_1$ Conversion in KCl with Sr Impurity. By P. CAMAGNI, G. CHIAROTTI, F. G. FUMI and L. GIULOTTO, Istituto di Fisica, Università di Pavia, Italy.....	225

	Page
The Association Energy between Positive Divalent Impurities and Positive-Ion Vacancies in NaCl and KCl Crystals. By F. BASSANI and F. G. FUMI, Istituto di Scienze Fisiche, Università di Milano, Italy.....	228
Coulomb Excitation of Levels in ^{19}F by Alpha-Particles. By G. A. JONES and D. H. WILKINSON, Cavendish Laboratory, Cambridge	230
XXVI. Notices of New Books and Periodicals received :—	
O. KLEMPERER's Electron Optics.....	234
E. M. CORSON's Introduction to Tensors, Spinors and Relativistic Wave-Equations.....	234
E. T. JAYNES's Investigations in Physics, No. 1: Ferroelectricity	235
RICHARD F. SHEA's Principles of Transistor Circuits ..	235
THE FARADAY SOCIETY's The First Fifty Years, 1930-9153	236

NUMBER 362—MARCH

XXVII. On Simplifying the Reduction by Least Squares of Angular Distribution Experiments in Nuclear Physics. By P. C. PRICE, Cavendish Laboratory, Cambridge	237
XXVIII. The Yield Strength of Partly Ordered Cu_3Au Wires. By W. D. BIGGS and T. BROOM, Department of Metallurgy, University of Birmingham.....	246
XXIX. On the Nature of the Discrete Radio Sources. By R. Q. TWISS, Services Electronics Research Laboratory, Baldock, Herts.....	249
XXX. Special Mechanisms in the Reaction $^7\text{Li}(\text{p}\gamma)^8\text{Be}$. By D. H. WILKINSON, Cavendish Laboratory, Cambridge.....	259
XXXI. A λ -Anomaly in the Specific Heat of Solid Hydrogen. By R. W. HILL and B. W. A. RICKETSON, The Clarendon Laboratory, Oxford	277
XXXII. Magnetic Behaviour of Thin Single-Crystal Nickel Films. By L. E. COLLINS and O. S. HEAVENS, University of Reading.....	283
XXXIII. Thermal Expansion of Simple Solids at Low Temperatures and Grüneisen's Law. By D. BLJL and H. PULLAN, Clarendon Laboratory, Oxford	290
XXXIV. The Correction of Elasticity Measurements on Slightly Anisotropic Materials. By H. PURSEY and H. L. COX, National Physical Laboratory, Teddington	295
XXXV. Red Shifts in the Spectra of Celestial Bodies. By E. FINLAY-FREUNDLICH, The University Observatory, St. Andrews.....	303
XXXVI. On Freundlich's Red-Shift. By D. TER HAAR, St. Salvator's College, University of St. Andrews.....	320
XXXVII. Cohesion of the Alkali Metals in the Thomas-Fermi-Dirac Theory. By N. H. MARCH, Department of Physics, The University, Sheffield	325
XXXVIII. The Anomalous Spin of ^{47}Ti . By B. H. FLOWERS, Atomic Energy Research Establishment, Harwell	329
XXXIX. Experiments on Supersonic Flow over Flat-Nosed Circular Cylinders at Yaw. By I. M. HALL, Fluid Motion Laboratory, University of Manchester.....	333

	Page
XL. Correspondence :—	
Etch Pit Attack on Plastically Deformed Aluminium. By P. J. E. FORSYTH, Metallurgy Department, R.A.E., Farnborough	344
Erratum	345
XLI. Notices of New Books and Periodicals received :—	
WILLIAM EDMUND MILNE'S Numerical Solution of Differ- ential Equations	346
RONALD W. GURNEY'S Ionic Processes in Solution.....	346

NUMBER 363—APRIL

XLII. On the Fragmentations of Heavy Cosmic Ray Nuclei. By K. GOTTSTEIN, H. H. WILLS Physical Laboratory, University of Bristol and Max-Planck-Institut für Physik, Göttingen.....	347
XLIII. The Ideal Crystal at Absolute Zero. By L. SALTER, The Clarendon Laboratory, Oxford.....	360
XLIV. The Simon Melting Equation. By L. SALTER, The Clarendon Laboratory, Oxford	369
XLV. Spins of Odd-Odd Nuclei in the j - j Coupling Model: I. By A. HITCHCOCK, Cavendish Laboratory, Cambridge.....	379
XLVI. Spins of Odd-Odd Nuclei in the j - j Coupling Model: II. By A. HITCHCOCK, Cavendish Laboratory, Cambridge	385
XLVII. Theory of the Effect of an Electric Field on Liquid Viscosity. By R. EISENSCHITZ and G. H. A. COLE, Queen Mary College, University of London	394
XLVIII. On the Molecular Distribution Functions of a One- Dimensional Fluid: I. By ALLADI RAMAKRISHNAN, Department of Physics, University of Madras.....	401
XLIX. Isolation and Measurement of the Helium-4, Helium-3 and Tritium Produced in Steel by 340 mev Proton Bombardment. By G. R. MARTIN, S. J. THOMSON and G. WARDLE, Londonderry Laboratory for Radiochemistry, University of Durham and K. I. MAYNE, Clarendon Laboratory, Oxford	410
L. Some Observations on the Decay of Neutral V -Particles in Photographic Emulsions. By M. YASIN, H. H. WILLS Physical Laboratory, University of Bristol.....	413
LI. Observations on Charged Hyperons in Photographic Emulsions. By M. W. FRIEDLANDER, H. H. WILLS Physical Laboratory, University of Bristol.....	418
LII. Evidence for Nuclear Interaction of a Charged Hyperon Arrested in Photographic Emulsion. By R. H. W. JOHNSTON and C. O'CEALLAIGH, School of Cosmic Physics, Dublin Institute for Advanced Studies.....	424
LIII. Proton-Gamma Angular Correlations and Gamma-Ray Angular Distributions in the $^{10}\text{B}(\alpha, p\gamma)^{13}\text{C}$ Reaction. By A. G. STANLEY, Cavendish Laboratory, Cambridge.....	430

NUMBER 364—MAY

LIV. The Surface of a Nucleus. By J. M. C. SCOTT, Cavendish Laboratory, Cambridge	441
LV. A Property of 'Repeating' Secular Determinants. By H. O. PRITCHARD and F. H. SUMNER, Department of Chemistry, University of Manchester.....	466

	Page
LVI. Systematic Wind Measurements at Altitudes of 80–100 km Using Radio Echoes from Meteor Trails. By J. S. GREENHOW, Jodrell Bank Experimental Station	471
LVII. Anomalous Electron-Scattering in Metals. By D. K. C. MACDONALD and W. B. PEARSON, Physics Division, National Research Council, Ottawa	491
LVIII. The Effects of Finite Size and Decentring of the Source in an Angular Correlation Experiment. By ERNST BREITENBERGER, Cavendish Laboratory, Cambridge	497
LIX. Magnetic Viscosity in Precipitation Alloys: FeNiAl, Fe ₂ NiAl and Alnico. By J. H. PHILLIPS, R. STREET and J. C. WOOLLEY, The University, Nottingham	505
LX. Elastic Scattering of 125 mev Electrons by Mercury. By SHEILA BRENNER and G. E. BROWN, Department of Mathematical Physics, University of Birmingham, and L. R. B. ELTON, Wheatstone Department of Physics, King's College, London	524
LXI. On the Mass of the Λ^0 -Particle. By M. W. FRIEDLANDER, D. KEEFE, M. G. K. MENON and M. MERLIN, H. H. Wills Physical Laboratory, University of Bristol	533
LXII. Correspondence :—	
The State of Ionization of Fast Nitrogen Ions Passing through Matter. By K. G. STEPHENS and D. WALKER, Physics Department, University of Birmingham	543
Paramagnetic Resonance in Activated Carbon. By D. J. E. INGRAM and J. E. BENNETT, University of Southampton..	545
Collisional Effects and the Conduction Current in an Ionized Gas. By A. A. WARE, Research Laboratory, Associated Electrical Industries Ltd., Aldermaston, Berks.	547
LXIII. Notices of New Books and Periodicals received :—	
L. HOWARTH's Modern Developments in Fluid Dynamics—High Speed Flow	550
A. B. GILLESPIE's Signal, Noise and Resolution in Nuclear Counter Amplifiers	550

NUMBER 365—JUNE

LXIV. A Radio Astronomical Investigation of Drift Movements in the Upper Atmosphere. By A. MAXWELL and M. DAGG, Jodrell Bank Experimental Station, University of Manchester	551
LXV. The Classification and Mean Lifetimes of θ^0 - and Λ^0 -Particles. By D. B. GAYTHER, The Physical Laboratories, The University, Manchester	570
LXVI. The Remanent Magnetism of Some Sedimentary Rocks in Britain. By J. A. CLEGG, MARY ALMOND and P. H. S. STUBBS, Department of Physics, Imperial College of Science and Technology	583
LXVII. Royal Society Depository for Unpublished Mathematical Tables	599
LXVIII. The Surface Energy of Colloidal Metals in Ionic Lattices. By ALLEN B. SCOTT, H. H. Wills Physical Laboratory, University of Bristol	610
LXIX. Electromagnetic Separation of Spallation Products. By GÖRAN ANDERSSON, The Gustaf Werner Institute for Nuclear Chemistry, University of Uppsala, Uppsala, Sweden	621

	Page
LXX. The Markings in the Cleavage Surfaces of Zinc Single Crystals. By A. DERUYTTERE, Institute de Métallurgie, Université de Louvain and G. B. GREENOUGH, Department of Metallurgy, University of Sheffield....	624
LXXI. The Formation of Twins by a Moving Crack. By B. A. BILBY and R. BULLOUGH, Department of Metallurgy, University of Sheffield	631
LXXII. Correspondence :—	
The Magnetic Properties of Alloys of Cobalt and Nickel with Palladium and Platinum. By E. P. WOHLFARTH, Department of Mathematics, Imperial College, London..	647
The Specific Heat of Lithium Fluoride at Low Temperatures. By G. O. JONES and D. L. MARTIN, Department of Physics, Queen Mary College, University of London..	649
The Pile Irradiation of Quartz Crystal Oscillators. By F. B. JOHNSON, Signals Research and Development Establishment, Christchurch and R. S. PEASE, Atomic Energy Research Establishment, Harwell.....	651
The Velocity of Elastic Waves in the Solidified Inert Gases. By T. H. K. BARRON, Clarendon Laboratory, Oxford and C. DOMB, Royal Society Mond Laboratory, Cambridge	654
The Diffusion of Nitrogen in Alpha Iron. By W. R. THOMAS and G. M. LEAK, The British Iron and Steel Research Association	656
LXXIII. Notices of New Books and Periodicals received :—	
J. ROTBLAT's Atomic Energy : A Survey.....	660
J. D. CRAGGS and J. M. MEEK's High Voltage Laboratory Technique	660
A. H. COTTRELL's Dislocations and Plastic Flow in Crystals	661
D. J. HUGHES's Neutron Optics.....	661
W. G. BICKLEY's Bessel Functions and Formulae.....	661
T. W. CHAUNDY, P. R. BARRETT and CHARLES BATEY's The Printing of Mathematics.....	662
H. JEFFREYS's The Earth, its Origin, History and Physical Constitution	662

NUMBER 366—JULY

LXXIV. A New Type of Interferometer for Use in Radio Astronomy. By R. HANBURY BROWN, Jodrell Bank Experimental Station, Cheshire and R. Q. TWISS, Services Electronics Research Laboratory, Baldock, Herts.	663
LXXV. The Natural Radioactivity of Lutetium. By D. DIXON, A. McNAIR and S. C. CURRAN, Department of Natural Philosophy, The University, Glasgow, W.2.....	683
LXXVI. Wave Motions and the Aerodynamic Drag on a Free Oil Surface. By J. R. D. FRANCIS, Imperial College, London.....	695
LXXVII. Isotopic Spin Selection Rules—V : Radiations from ^{10}B . By G. A. JONES and D. H. WILKINSON, Cavendish Laboratory, Cambridge	703
LXXVIII. The Propagation of Longitudinal Elastic Waves along Cylindrical Bars. By H. KOLSKY, Imperial Chemical Industries Limited, Butterwick Research Laboratories, Welwyn, Herts.	712

	Page
LXXIX. Energy Band Shapes and Band Widths in Metals. By S. RAIMES, Department of Mathematics, Imperial College, London.....	727
LXXX. The Forward Displacement of the Nitrogen Isotope of Mass 13 Produced by Bombardment of Aluminium with the Isotope 14. By K. F. CHACKETT and J. H. FREMLIN, Physics Department, University of Birmingham	735
LXXXI. The Angular Distributions of α -Particles from the $^{14}\text{N}(\text{d}, \alpha)$ Reaction at Low Bombarding Energies. By D. CARTWRIGHT, L. L. GREEN and J. C. WILLMOTT, Nuclear Physics Research Laboratory, University of Liverpool.....	742
LXXXII. On the Relation between Čerenkov Radiation and Bremsstrahlung. By J. D. LAWSON, Atomic Energy Research Establishment, Harwell.....	748
LXXXIII. Neutron Scattering and the Weak-Interaction Model of the Nucleus. By J. M. C. SCOTT, Cavendish Laboratory, Cambridge....	751
LXXXIV. A Note on the Divergence of the Perturbation Method in Field Theory. By S. F. EDWARDS, Department of Mathematical Physics, The University of Birmingham.....	758
LXXXV. The $\text{d-}^6\text{Li}$ Reactions. By F. HRST, I. JOHNSTONE and M. J. POOLE, Atomic Energy Research Establishment, Harwell.....	762
LXXXVI. Correspondence :—	
The Thermal Conductivity of Gallium Single Crystals at Low Temperatures. By H. M. ROSENBERG, Clarendon Laboratory, Oxford	767
The Angular Correlation between Gamma-Rays and Alpha-Particles from $^7\text{Li}(\text{p}\gamma)^8\text{Be}(\alpha)^4\text{He}$. By E. K. INALL, Research School of Physical Sciences, Australian National University, Canberra.....	768
The Temperature Dependence of the Critical Shear Stress and of Work-hardening of Metal Crystals. By ALFRED SEEGER, Max-Planck-Institut für Metallforschung und Institut für theoretische und angewandte Physik der Technischen Hochschule Stuttgart, Stuttgart, Germany	771
Paramagnetic Resonance in Plutonyl Rubidium Nitrate, and the Spin of ^{239}Pu . By B. BLEANEY, P. M. LLEWELLYN and M. H. L. PRYCE, Clarendon Laboratory, Oxford and G. R. HALL, Atomic Energy Research Establishment, Harwell	773

NUMBER 367—AUGUST

LXXXVII. Theory of Dislocations in Germanium. By W. T. READ, Jr., Bell Telephone Laboratories	775
LXXXVIII. The Lattice Spacings of Dilute Solid Solutions of Zirconium, Niobium, Molybdenum, Rhodium, and Palladium in Ruthenium. By A. HELLAWELL and W. HUME-ROTHERY, Inorganic Chemistry Laboratory, Oxford	797
LXXXIX. Angular Correlations in Deuteron Reactions. By A. G. STANLEY, Cavendish Laboratory, Cambridge.....	807

	Page
XC. The Influence of Zero-Point Energy on the Thermodynamic Properties of the Low Boiling Point Elements. By J. S. DUGDALE and D. K. C. MACDONALD, Division of Physics, National Research Council, Ottawa, Canada	811
XCI. An Extended Use of Perturbation Theory. By R. N. GOULD, H. H. WILLS Physical Laboratory, University of Bristol and A. CUNLIFFE, University College of Hull.....	818
XCII. Relations between the Elastic Moduli and the Plastic Properties of Polycrystalline Pure Metals. By S. F. PUGH, Atomic Energy Research Establishment, Harwell	823
XCIII. The Hardness Properties of Cube Faces of Diamond. By E. M. WILKS and J. WILKS, Clarendon Laboratory, Oxford.....	844
XCIV. The Specific Heat of Graphite below 90°K. By U. BERGENLID, R. W. HILL, F. J. WEBB and J. WILKS, The Clarendon Laboratory, Oxford	851
XCV. Observations on the Associated Production of Heavy Mesons and Hyperons. By C. DAHANAYAKE, P. E. FRANCOIS, Y. FUJIMOTO, P. IREDALE, C. J. WADDINGTON and M. YASIN, H. H. WILLS Physical Laboratory, University of Bristol	855
XCVI. A New Estimate of the Lifetime of Δ^0 -Particles. By D. I. PAGE, The Physical Laboratories, The University, Manchester.....	863
XCVII. The Elastic Scattering of Neutrons by Alpha Particles. By B. H. BRANSDEN and J. S. C. MCKEE, Department of Physics, Queen's University of Belfast	869
XCVIII. Correspondence :— Thermoelectric Power of Monovalent Metals at High Temperature. By P. G. KLEMENS, Division of Physics, Commonwealth Scientific and Industrial Research Organization, Sydney	881
XCIX. Notices of New Books and Periodicals received :— O. R. FRISCH's Progress in Nuclear Physics.....	883
N. F. RAMSEY's Nuclear Moments.....	884
H. J. J. BRADDICK's The Physics of Experimental Method	884
ROBERT GOMER and CYRIL STANLEY SMITH's Structure and Properties of Solid Surfaces.....	885
G. W. CARTER's The Electromagnetic Field in its Engineering Aspect.....	885
Review of Occasional Notes of the Royal Astronomical Society	886

NUMBER 368—SEPTEMBER

C. The Calculation of Heats of Formation of Binary Alloys. By J. H. O. VARLEY, Department of Metallurgy, The University, Birmingham	887
CI. Atmospherics with Long Trains of Pulses. By F. HEPBURN and E. T. PIERCE, Cavendish Laboratory, Cambridge	917
CII. Large Angle Scattering of μ -Mesons in Lead. By I. B. MCDIARMID, The Physical Laboratories, The University, Manchester	933
CIII. The Neutrons and Alpha-Particles from the Disintegration of ^9Be by 6 mev Gamma-Rays. By J. H. CARVER, E. KONDAIAH and B. D. MCDANIEL, Research School of Physical Sciences, Australian National University, Canberra	948

	Page
CIV. The Photo-Production of an Isomeric State in ^{207}Pb . By J. M. REID and K. G. MCNEILL, Department of Natural Philosophy, The University of Glasgow	957
CV. Coulomb Excitation of Isomeric States in Silver. By TORBEN HUUS and ARNOLD LUNDÉN, Institute for Theoretical Physics, University of Copenhagen	966
CVI. The Emission Polar Diagram of the Radio-Frequency Radiation from Sunspots. By K. E. MACHIN and P. A. O'BRIEN, Cavendish Laboratory, Cambridge	973
CVII. The Anomalous Scattering of μ -Mesons. By G. D. ROCHESTER and A. W. WOLFENDALE, The Physical Laboratories, The University, Manchester	980
CVIII. Correspondence :—	
The Diffusion of Carbon in Alpha Iron. By W. R. THOMAS and G. M. LEAK, British Iron and Steel Association	986
The Absolute Photo-Neutron Yield from Copper for the Lithium Gamma-Rays. By J. H. CARVER and E. KONDAIAH, Research School of Physical Sciences, Australian National University, Canberra	988
Nuclear Spin of ^{241}Pu . By B. BLEANEY, P. M. LLEWELLYN, M. H. L. PRYCE, Clarendon Laboratory, Oxford and G. R. HALL, Atomic Energy Research Establishment, Harwell	991
Paramagnetic Resonance in Neptunyl Rubidium Nitrate. By B. BLEANEY, P. M. LLEWELLYN, M. H. L. PRYCE, Clarendon Laboratory, Oxford and G. R. HALL, Atomic Energy Research Establishment, Harwell	992
CIX. Notices of New Books and Periodicals received :—	
J. L. SYNGE's Geometrical Mechanics and de Broglie Waves	994
J. G. CROWTHER's The Sciences of Energy	994
THE PHYSICAL SOCIETY's Reports on Progress in Physics, Vol. 17	994
R. KRONIG's Text-Book of Physics	995
H. ALFVEN's On the Origin of the Solar System	996
C. ZWIKKER's Physical Properties of Solid Materials	996

NUMBER 369—OCTOBER

CX. An Experimental Investigation of the Interaction of a Shock Wave with a Subsonic Stream Bounded by a Wall. By D. W. HOLDER, A. CHINNECK and G. E. GADD, Aerodynamics Division, National Physical Laboratory	997
CXI. Astrophysical Considerations Regarding Freundlich's Red-Shift. By W. H. MCCREA, Royal Holloway College	1010
CXII. On the Observational Data Relating to Freundlich's Proposed Red-shift Law. By E. MARGARET BURBIDGE, Cambridge and G. R. BURBIDGE, Cavendish Laboratory, Cambridge	1019
CXIII. Some more Remarks on Freundlich's Red-Shift. By D. TER HAAR, St. Salvator's College, University of St. Andrews	1023
CXIV. Measurements of Forty-four Charged V -Events. By J. S. BUCHANAN, W. A. COOPER, D. D. MILLAR and J. A. NEWTH, The Physical Laboratories, The University, Manchester	1025
CXV. Evidence for the β -Decay of a K -Meson. By M. W. FRIEDLANDER, D. KEEFE, M. G. K. MENON and L. VAN ROSSUM, H. H. Wills Physical Laboratory, University of Bristol	1043

	Page
CXVI. Counters with Random Dead Time. By ALLADI RAMAKRISHNAN, Department of Physics, University of Madras	1050
CXVII. On the Molecular Distribution Functions of a One-Dimensional Fluid: II. By ALLADI RAMAKRISHNAN and P. M. MATHEWS, Department of Physics, University of Madras	1053
CXVIII. A Cloud Chamber Study of the Interactions of Fast μ -Mesons. By V. APPAPILLAI, A. W. MAILVAGANAM and A. W. WOLFENDALE, The Physical Laboratories, University of Ceylon	1059
CXIX. Notes on Soft X-ray Spectra, particularly of the Fe Group Elements. By H. W. B. SKINNER, F.R.S., T. G. BULLEN and J. E. JOHNSTON, The University, Liverpool	1070
CXX. Correspondence :—	
The Mechanism of Rolling Friction. By D. TABOR, Research Laboratory for the Physics and Chemistry of Surfaces, Department of Physical Chemistry, Cambridge	1081
The Thickness of the Saturated Helium Film Above and Below the λ -point. By A. C. HAM and L. C. JACKSON, H. H. Wills Physical Laboratory, University of Bristol	1084
Electrical Resistance Minimum in Dilute Copper Alloys. By W. B. PEARSON, Division of Physics, National Research Council, Ottawa, Canada	1087
A 7-Second Iridium Isomer. By F. D. S. BUTEMENT and A. J. POË, Atomic Energy Research Establishment, Harwell	1090
The Scattering of Deuterons and Protons by Alpha-Particles. By R. G. FREEMANTLE, Physics Department, University of Birmingham, T. GROTDAL, Fysisk Institutt, University of Bergen, Norway, W. M. GIBSON, R. McKEAGUE, Physics Department, Queen's University of Belfast, D. J. PROWSE, H. H. Wills Physical Laboratory, University of Bristol and J. ROTBLAT, Physics Department, St. Bartholomew's Hospital, London	1090
Polytypism of Cadmium Iodide. By RICHARD S. MITCHELL, Department of Geology, University of Virginia, Charlottesville, Virginia	1093
Direct Evidence for Dislocations in Aluminium-Copper Alloys. By HEINZ WILSDORF, National Physical Laboratory, South African Council for Scientific and Industrial Research, Pretoria and DORIS KUHLMANN-WILSDORF, Department of Physics, University of the Witwatersrand, Johannesburg	1096
CXXI. Notices of New Books and Periodicals received :—	
LEWIS and WELLS's Millimicrosecond Pulse Techniques ..	1098
K. H. STEWART's Ferromagnetic Domains	1098

NUMBER 370—NOVEMBER

CXXII. A Search for Natural Radioactivity in Neodymium, Rhenium and Osmium. By D. DIXON and A. McNAIR, Department of Natural Philosophy, University of Glasgow	1099
CXXIII. Time Variations of Extensive Air Showers and the Origin of Cosmic Rays. By T. E. CRANSHAW and W. GALBRAITH, Atomic Energy Research Establishment, Harwell	1109
CXXIV. Statistics of the Occupation of Dislocation Acceptor Centres. By W. T. READ, Jr., Bell Telephone Laboratories, N.J.	1119

	Page
CXXV. A Restricted Quantum Statistical Proof of the Third Law of Thermodynamics. By P. T. LANDSBERG, Randal Morgan Laboratory, University of Pennsylvania, Philadelphia	1129
CXXVI. The Isotropic Component of Cosmic Radio-Frequency Radiation. By J. R. SHAKESHAFT, Cavendish Laboratory, Cambridge.	1136
CXXVII. Double Pion Production and the Nature of Pseudoscalar Coupling. By P. BOCCIERI and G. FELDMAN, Department of Mathematical Physics, The University, Birmingham	1145
CXXVIII. An Elementary Reasoned Account of the General Circulation of the Atmosphere. By M. J. LIDTHILL, Department of Mathematics, University of Manchester	1154
CXXIX. The Specific Heat of Liquid Helium II as a Function of Pressure. By G. R. HERCUS and J. WILKS, Clarendon Laboratory, Oxford	1163
CXXX. The Surface Energy of Sodium. By ALLEN B. SCOTT, H. H. Wills Physical Laboratory, University of Bristol	1173
CXXXI. On the Inhibition of Convection by a Magnetic Field: II. By S. CHANDRASEKHAR, F.R.S., Yerkes Observatory, University of Chicago	1177
CXXXII. Nuclear Orientation of ^{54}Mn . By M. A. GRACE, C. E. JOHNSON, N. KURTI, H. R. LEMMER and F. N. H. ROBINSON, Clarendon Laboratory, Oxford	1192
CXXXIII. Polarized γ -Rays from Oriented ^{54}Mn Nuclei. By G. R. BISHOP, J. M. DANIELS, H. DURAND, C. E. JOHNSON and J. PEREZ, Clarendon Laboratory, Oxford	1197
CXXXIV. Interaction of 19 mev Deuterons with Carbon. By R. G. FREEMANTLE, University of Birmingham, W. M. GIBSON, The Queen's University of Belfast and J. ROTBLAT, St. Bartholomew's Hospital Medical College, London	1200
CXXXV. Angular Distribution of Neutrons from the Reaction $^{11}\text{B}(\text{d}, \text{n})^{12}\text{C}$ at 0.85 mev Bombarding Energy. By ARNFINN GRAUE, Fysisk Institutt, Norway	1205
CXXXVI. Correspondence :—	
On the Acceleration of Cosmic Ray Particles. By W. B. THOMPSON, Atomic Energy Research Establishment, Harwell.....	1210
On the Evaluation of Characteristic Temperatures for Cubic Crystals. By A. B. BHATIA and G. E. TAUBER, Division of Physics, National Research Council, Ottawa	1211
The Elastic Scattering of Protons by Fluorine. By G. DEARNALEY, Cavendish Laboratory, Cambridge	1213
On the Interaction of a Dislocation and a Charged Solute Ion. By ROLF LANDAUER, Research Department, International Business Machines Corporation, Poughkeepsie, New York	1216
Further Evidence for the β -Decay of K-Mesons. By C. DAHANAYAKE, P. E. FRANCOIS, Y. FUJIMOTO, P. IREDALE, C. J. WADDINGTON and M. YASIN, H. H. Wills Physical Laboratory, University of Bristol	1219
Paramagnetic Resonance at Radio Frequencies in Low Temperature Carbons. By D. J. E. INGRAM and J. G. TAPLEY, Department of Electronics, University of Southampton	1221
CXXXVII. Notices of New Books and Periodicals received :—	
DIRK J. STRUIK's The Concise History of Mathematics	1224

NUMBER 371—DECEMBER

	Page
CXXXVIII. Concentration Contours in Grain Boundary Diffusion. By R. T. P. WHIPPLE, Atomic Energy Research Establishment, Harwell, Berks.	1225
CXXXIX. The Physical Nature of a Metal Surface in Conduction Theory. By H. A. MÜSER, British Council Fellow at H. H. Wills Physical Laboratory, University of Bristol	1237
CXL. Turbulence in the Upper Ionosphere. By A. MAXWELL, Jodrell Bank Experimental Station, University of Manchester	1247
CXLI. Self Trapped Electrons in a Fermi Gas. By J. S. PLASKETT, H. H. Wills Physical Laboratory, University of Bristol	1255
CXLII. Boundary Layer Growth in Three Dimensions. By L. C. SQUIRE, Department of Mathematics, University of Bristol	1272
CXLIII. Delayed Disintegration of a Nuclear Fragment. By A. SOLHEIM and S. O. SÖRENSEN, Fysisk Institutt, University of Oslo, Norway	1284
CXLIV. A Cloud Chamber Study of Cosmic Ray Interactions Underground. By H. J. J. BRADDICK and B. LEONTIC, The Physical Laboratories, The University of Manchester	1287
CXLV. The Quasi-Cylindrical Shock Tube. By W. CHESTER, Department of Mathematics, University of Bristol	1293
CXLVI. Multiple Beam Investigation of Liquid Helium in Narrow Gaps. By N. G. MCCRUM, Clarendon Laboratory, Oxford	1302
CXLVII. The Alpha-Particle Component of the Cosmic Radiation. By C. J. WADDINGTON, H. H. Wills Physical Laboratory, University of Bristol	1312
CXLVIII. Neutron-Widths and the Density of Nuclear Levels. By J. M. C. SCOTT, Cavendish Laboratory	1322
CXLIX. The Characteristic Temperature of Platinum from x-Ray Reflections. By K. ALEXOPOULOS and P. EUTHYMIU, Physical Laboratory, University of Athens	1332
CL. Correspondence:—	
The Lattice Thermal Conductivity of Dilute Copper Alloys at Low Temperatures. By G. K. WHITE and S. B. WOODS, Division of Physics, National Research Council, Ottawa, Canada	1343
CLI. Notices of New Books and Periodicals received:—	
E. O. HALL's Twinning and Diffusionless Transformations in Metals	1346
A. E. GREEN and W. ZERNA's Theoretical Elasticity....	1346
M. A. JASWON's The Theory of Cohesion	1347
Index to Volume	1348

P L A T E S

1. Illustrative of A. H. ABDON'S Correspondence on Slip Lines, Etch-pits and Corrosion-pits.
2. Illustrative of N. J. WADSWORTH and N. THOMPSON'S Correspondence on Observations on the Fatigue Fracture of Copper.
3. Illustrative of L. E. COLLINS and O. S. HEAVEN'S Paper on Magnetic Behaviour of Thin Single-Crystal Nickel Films.
- 4 & 5. Illustrative of I. M. HALL'S Paper on Experiments on Supersonic Flow over Flat-Nosed Circular Cylinders at Yaw.
6. Illustrative of P. J. E. FORSYTH'S Correspondence on Etch Pit Attack on Plastically Deformed Aluminium.
- 7-9. Illustrative of K. GOTTSTEIN'S Paper on The Fragmentations of Heavy Cosmic Ray Nuclei.
- 10 & 11. Illustrative of M. YASIN'S Paper on Some Observations on the Decay of Neutral V -Particles in Photographic Emulsions.
- 12 & 13. Illustrative of M. W. FRIEDLANDER'S Paper on Observations on Charged Hyperons in Photographic Emulsions.
14. Illustrative of R. H. W. JOHNSTON and C. O'CEALLAIGH'S Paper on Evidence for Nuclear Interaction of a Charged Hyperon Arrested in Photographic Emulsion.
- 15 & 16. Illustrative of J. S. GREENHOW'S Paper on Systematic Wind Measurements at Altitudes of 80-100 km Using Radio Echoes from Meteor Trails.
17. Illustrative of D. B. GAYTHER'S Paper on the Classification and Mean Lifetimes of θ^0 - and Λ^0 -Particles.
18. Illustrative of J. A. CLEGG, MARY ALMOND and P. H. S. STUBB'S Paper on The Remanent Magnetism of Some Sedimentary Rocks in Britain.
- 19 & 20. Illustrative of A. DERUYTTERE and G. B. GREENOUGH'S Paper on The Markings in the Cleavage Surfaces of Zinc Single Crystals.
- 21-23. Illustrative of J. R. D. FRANCIS'S Paper on Wave Motions and the Aerodynamic Drag on a Free Oil Surface.
24. Illustrative of H. KOLSKY'S Paper on The Propagation of Longitudinal Elastic Waves along Cylindrical Bars.
25. Illustrative of D. I. PAGE'S Paper on A New Estimate of the Lifetime of Λ^0 -Particles.
- 26-29. Illustrative of F. HEPBURN and E. T. PIERCE'S Paper on Atmospheres with Long Trains of Pulses.
30. Illustrative of D. W. HOLDER, A. CHINNECK and G. E. GADD'S Paper on An Experimental Investigation of the Interaction of a Shock Wave with a Subsonic Stream Bounded by a Wall.
- 31 & 32. Illustrative of J. S. BUCHANAN, W. A. COOPER, D. D. MILLAR and J. A. NEWTH'S Paper on Measurements of Forty-four Charged V -Events.
33. Illustrative of M. W. FRIEDLANDER, D. KEEFE, M. G. K. MENON and L. VAN ROSSUM'S Paper on Evidence for the β -Decay of a K -Meson.

34. Illustrative of HEINZ WILSDORF and DORIS KUHLMANN-WILSDORF's Correspondence on Direct Evidence for Dislocations in Aluminium-Copper Alloys.
35. Illustrative of A. SOLHEIM and S. O. SÖRENSEN's Paper on Delayed Disintegration of a Nuclear Fragment.
36. Illustrative of H. J. J. BRADDICK and B. LEONTIC's Paper on A Cloud Chamber Study of Cosmic Ray Interactions Underground.
- 37 & 38. Illustrative of N. G. McCrum's Paper on Multiple Beam Investigation of Liquid Helium in Narrow Gaps.
